Full-Stack Product Engineer

I build web applications for property management and business operations, across frontend, backend, and deployment. Building software since 2018; production web applications since 2024. Available for scoped freelance projects and full-time opportunities.

WORK EXPERIENCE

Mashup Garage

01/2024 - Present

Software Developer · Full-time

Philippines

- Rebuilt the frontend and backend of a property-management application and handled deployment using AI-assisted development. Made tenant rent payments functional and replaced nonfunctional Settings navigation.
- Worked with an AWS Amplify frontend, Docker-based Elastic Beanstalk backend, and DynamoDB; removed legacy infrastructure and changed the AWS support plan.
- Agency Discovery Marketplace: Built the public-facing marketplace frontend and integrated DatoCMS-powered editorial content.
- Recruitment Platform: Implemented agency discovery, review submission, and dashboard interfaces, and contributed to the Supabase data model.
- Implemented Supabase queries, authentication flows, and API integrations.

Career Transition

03/2023 - 01/2024

Self-Directed Web Development Study

Philippines

- Transitioned from native Android to web engineering; built projects in JavaScript, TypeScript, and React before joining Mashup Garage.

Mad Underground

01/2020 - 03/2023

Software Developer · Full-time

Philippines

- Built and released production Android applications in Java via Google Play Console.
- Implemented UI screens and developer-facing tools in collaboration with designers.

Anino Inc.

04/2018 - 01/2020

Software Developer · Full-time

Philippines

- Implemented Unity and C# UI features from designer mockups, improving design-to-build consistency.
- Collaborated with engineers, designers, artists, and producers in Agile workflows.

EDUCATION

BS Information Technology, Animation and Game Development

FEU Institute of Technology

Manila, Philippines · 06/2012 - 03/2018

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, Radix UI
